Non-Technical Contributions

Area	Contributors
Research	Aspen Chen; Aditya Kumar / Sylindril
Communications & Project Management	Andrew Zhang

Technical Contribution Evidence

Basis: local git history fetched and regenerated through 2026-04-27 23:26:43 EDT (-0400), using `origin/main` only. Unmerged PR branches are excluded. This treats Sylindril as the contributor recorded in git as Aditya Kumar. Merge commits are not counted as implementation work. The primary quantity tables use authored non-merge commits, path-specific numstat, and current-line blame for production source only: cache artifacts, tracked `.json` files, docs/markdown, tests, and test/run fixtures are excluded so data dumps, documentation, and large test artifacts do not inflate product ownership.

Attribution corrections are applied in the reproducible script: commit `86d234a` is counted for Hin Kit Eric Wong, and Aspen-attributed lines under `backend/reflexion_agent` are counted for Hin Kit Eric Wong because later commits clobbered Reflexion attribution. The tables below use those project-level corrections without publishing email addresses or local machine identifiers.

Summary

No overall rank is asserted here; the feature-level history below shows where the quantities came from. The first technical table is ordered by current blamed production lines; contributor rows in the other summary tables are alphabetical unless the table is explicitly quantity-based.

Main product-path production quantities:

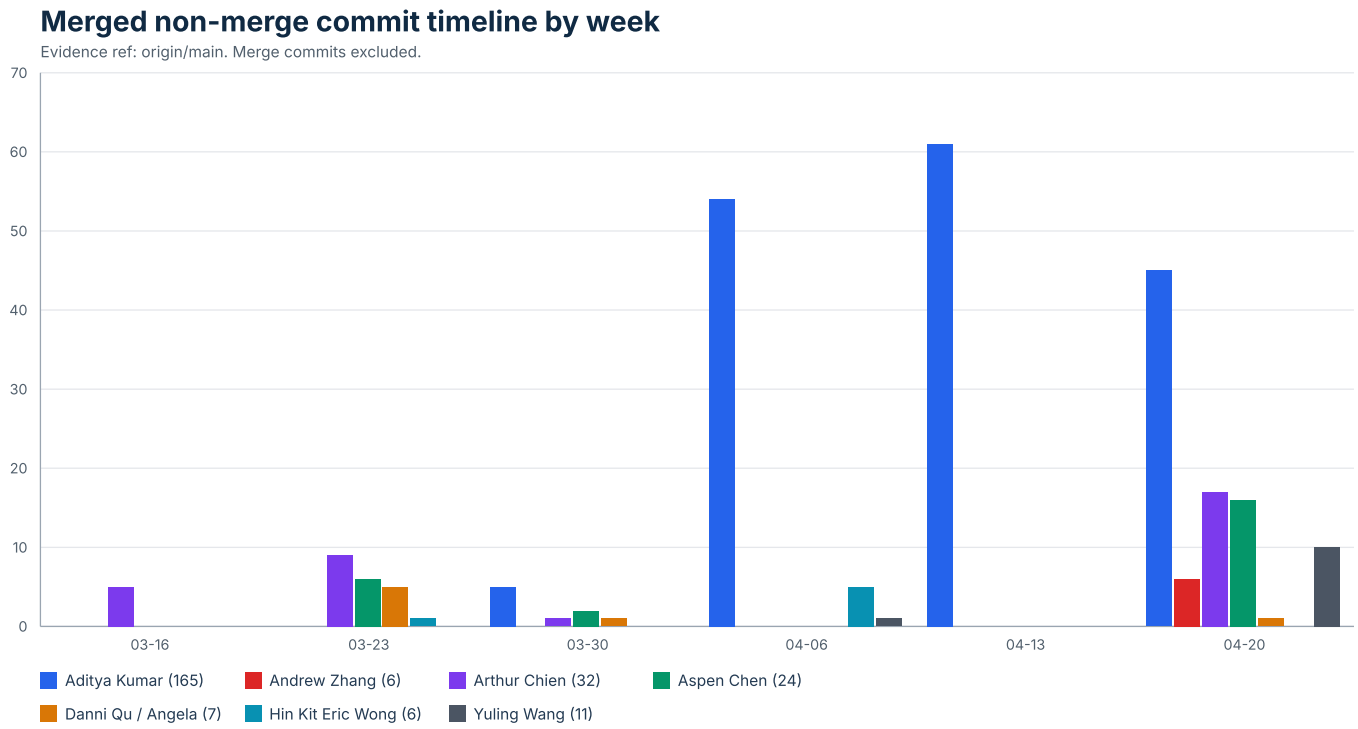
Contributor	Current blamed lines	Non-merge commits	Lines added	Lines deleted
Aditya Kumar / Sylindril	10,658	156	15,362	6,189
Aspen Chen	6,742	19	7,253	373
Arthur Chien	5,223	26	6,888	1,168
Hin Kit Eric Wong	2,031	13	3,003	174
Yuling Wang	553	10	575	61
Danni Qu / Angela	457	5	539	87
Andrew Zhang	331	5	332	300

Repository-wide commit counts with the `86d234a` attribution correction:

Contributor	Commits
Aditya Kumar	165
Andrew Zhang	14
Arthur Chien	38
Aspen Chen	32
Danni Qu / Angela	8
Hin Kit Eric Wong	6
Yuling Wang	11

Merged non-merge commit timeline by week:

Contributor	Total	First	Last	Mar 16	Mar 23	Mar 30	Apr 06	Apr 13	Apr 20	Apr 24-25
Aditya Kumar / Sylindril	165	2026-04-05	2026-04-25	0	0	5	54	61	45	28
Andrew Zhang	6	2026-04-25	2026-04-25	0	0	0	0	0	6	6
Arthur Chien	32	2026-03-19	2026-04-24	5	9	1	0	0	17	6
Aspen Chen	24	2026-03-23	2026-04-24	0	6	2	0	0	16	2
Danni Qu / Angela	7	2026-03-23	2026-04-25	0	5	1	0	0	1	1
Hin Kit Eric Wong	6	2026-03-28	2026-04-10	0	1	0	5	0	0	0
Yuling Wang	11	2026-04-06	2026-04-25	0	0	0	1	0	10	2



Contributor Evidence

Aditya Kumar / Sylindril. The merged history attributes the core user journey, employee creation wizard, and application shell to Aditya/Sylindril: router/context/dashboard setup (`c39a01c` , `835fd27` , `dc5a6f5` , `f37a719`), creation wizard route and employee page (`46bebfb` , `692bccb`), initial wizard steps (`8cf83d0` , `f032dd0` , `081115c`), local employee persistence (`664b3db`), backend employee model/schema/API (`510dfbc` , `23ea2cc` , `14bf60e`), and the backend-backed employee migration (`0b234a8`). The wizard's skill and description evolution is also concentrated in Aditya commits: plugin arrays and multi-plugin UI (`e77adeb` , `5a237d3`), radial/list skill graph work (`a0f23d6` , `90ceb5d` , `4fa815f`), reusable skill browser and Learn Skills step (`69f7dc7` , `d11c78e`), model-picker hardening and description flow (`2467882` , `6fb25fc` , `f171847` , `c0247ef` , `6ae6472` , `7c239f9` , `19224fb`), and the System Prompt tab (`ccc0c82` , `fcb11a8` , `2914094`). Current path-specific evidence for wizard/employee/skill UX shows 6,404 added / 1,182 deleted lines over 89 Aditya commits, with 5,140 current blamed Aditya lines.

Adjacent Aditya work covers the merged demo simulator, marketplace, employee-detail workflow, and runtime hardening. Demo simulator commits include event processing (`9cc7044`), macOS-style window/taskbar/root simulator components (`b33dbec` , `754d2a6` , `9812c78`), browser/terminal/editor/notepad scenes (`09315fb` , `05f655f` , `dad57fa` , `5eb3272`), thinking/confidence/report overlays (`b6af9e7`), and mock stream support (`41a8d74`); current merged evidence for these paths shows 1,434 added / 0 deleted lines over 10 Aditya commits, with 1,402 current blamed lines. Marketplace work spans PostgreSQL dependencies, async engine, ORM models, Alembic setup, skill service layer, filesystem seeding, DB-backed skill routers, marketplace browse/search/install APIs, compatibility fallbacks, frontend marketplace tabs/cards/details, submission/review workflows, similar-skill comparison, inline edit/save flows, version history, and cleanup (`08661bc` , `e916393` , `25c1b39` , `4d22b71` , `6ff8e3e` , `22c89b3` , `293db7b` , `ba25b4b` , `a9f973e` , `850109b` , `a0dfa4c` , `25930a4` , `aa1cae2` , `8c66776` , `0235dbd` , `accdc8b` , `5a659fb` , `6544537` , `403480e` , `9d594c7` , `d1c88e3`). Employee-detail and infrastructure work includes scoped employee chat, activity console, report-card wrapper, active-status wiring, shared restore-message utility, crash guards, UUID validation, double-click guards, reusable confirmation dialogs, tab-state reset, skill-card layout fixes, start script, PostgreSQL bootstrapping, WSL line-ending repair, API fallback behavior, env templates/config loading, SQLAlchemy session fixes, path normalization, and path-traversal defenses (`703c9f2` , `9b62293` , `2d1126e` , `ac5004d` , `2b215f2` , `3714d16` , `3585a2f` , `dbd9357` , `c3898bc` , `4021d62` , `edae2f9` , `e2cacd2` , `56ab9d8` , `062359b` , `9d53914` , `d2bbe99` , `2a7e999` , `ab597d8` , `4c524d3` , `0f7974e` , `0174413` , `de59cc7` ,

`27ca84f`, `cd146b0`, `20e1627`). Across main product paths, the generated evidence table records 10,658 current blamed production lines, 156 non-merge commits, 15,362 added lines, and 6,189 deleted lines for Aditya.

Arthur Chien. Arthur contributed the initial repo/chat baseline, early skill-selection UI, agent-facing workflow integration, and workspace sidebar/canvas edit visualization (`8dcdc85`, `2a3a0af`, `91f05f6`, `15e93b9`, `f9099b5`, `ddb1382`, `3e521ab`). Arthur also delivered user-facing product surface around real-time editor PDF/Markdown support, quick-chat relocation to employee pages, SSE filtering, the Project Files subtab, and UI/layout polish (`225a2a9`, `d3a6ed2`, `8d507e5`, `a177a10`, `fed2175`, `9730872`). Additional subsystem evidence shows Arthur as a leading current-line owner for chat interface paths, agent runtime/OpenHands paths, workspace/editor/project-file paths, and the 100% current-blame author of the Project Files tab component. The merged production product-path evidence shows 26 Arthur non-merge commits, 6,888 added / 1,168 deleted lines, and 5,223 current blamed lines after the `86d234a` attribution correction.

Aspen Chen. Aspen contributed multimodal skill-ingestion integration, OpenHands integration, Docker workspace integration, browser live view/path selection, persona injection, report cards, metrics/trajectory plumbing, LLM induction, and user ratings (`0a3e53c`, `a11af01`, `6dc8185`, `fb34ff4`, `6472d94`, `7a06bc6`, `0356dd7`, `6678b89`, `365979c`, `98d6a3b`, `488e008`). Additional subsystem evidence shows Aspen as the leading current-line owner for backend API/runtime, employee detail tabs, report/metrics/trajectory, and near-pure browser live view and report UI components. The merged production product-path evidence shows 19 Aspen non-merge commits, 7,253 added / 373 deleted lines, and 6,742 current blamed lines after removing Reflexion-attribution clobbering from Aspen's totals.

Hin Kit Eric Wong. Hin Kit Eric Wong is credited with Reflexion implementation work under two explicit project attribution corrections: `86d234a` is counted for Eric, and Aspen-attributed production lines under `backend/reflexion_agent` are counted for Eric. With tests and run artifacts excluded from the primary production table, Reflexion agent paths show 1,736 added / 150 deleted lines over 13 commits credited to Eric, with 1,571 current blamed Eric production lines. The code-focused commits include `86d234a` for the original integration, `f9103c5` for reflexion agent/evaluator/reflector bug and logic fixes, and `fb31357` for step-ceiling and evaluator prompt tuning.

Andrew Zhang. Andrew's six merged non-merge commits are late bugfix/infrastructure work: hook-ordering/env cleanup (`8a7632f`), React Compiler/lint fixes (`25766f6`, `dfdb544`, `8502e57`), optional local Postgres startup (`44b07bc`), and pytest dependency coverage (`45010ae`).

Danni Qu / Angela. Danni/Angela's seven merged non-merge commits cover skill evaluation UI/API work (`db6cf63`, `45ab6d1`, `df87bcf`, `0f97e06`), SkillsBench import and oversized-task cleanup (`becbc46`, `f41efb1`), and OpenAI base URL config (`83a81a6`).

Yuling Wang. Yuling Wang's merged work covers stream termination/final-answer fixes, OpenAI model config and first-run environment fixes, wizard UI bugfixes, LLM similarity checking for skill evaluation, auto skill selection, and selected-skill agent context (`7310ee6`, `88d03f4`, `abe60bb`, `499a796`, `5066069`, `1c31b49`, `65f74d8`, `30039ed`, `78ff9cc`).

Subsystem Evidence

Focused production subsystem quantities:

Subsystem	Contributor	Non-merge commits	Lines added	Lines deleted	Current blamed lines
Demo simulator	Aditya Kumar / Sylindril	10	1,434	0	1,402
Demo simulator	Andrew Zhang	2	18	32	18
Journey / wizard / employee / skill UX	Aditya Kumar / Sylindril	89	6,404	1,182	5,140
Journey / wizard / employee / skill UX	Andrew Zhang	3	49	31	48
Journey / wizard / employee / skill UX	Arthur Chien	10	404	78	368
Journey / wizard / employee / skill UX	Aspen Chen	7	701	10	693
Journey / wizard / employee / skill UX	Yuling Wang	3	235	10	233
Reflexion agent	Arthur Chien	3	66	4	66
Reflexion agent	Hin Kit Eric Wong	13	1,736	150	1,571
Reflexion agent	Yuling Wang	3	155	12	154

Additional important production subsystem quantities:

Rows below include contributors with at least 100 current blamed production lines in that subsystem. The evidence script prints the complete contributor set, including minor lint/config edits.

Subsystem	Contributor	Non-merge commits	Lines added	Lines deleted	Current blamed lines
Agent runtime / OpenHands	Arthur Chien	19	1,283	537	1,570
Agent runtime / OpenHands	Aspen Chen	12	1,530	131	1,522
Agent runtime / OpenHands	Danni Qu / Angela	3	123	31	105
Agent runtime / OpenHands	Hin Kit Eric Wong	13	2,202	81	1,394
Agent runtime / OpenHands	Yuling Wang	7	222	30	204
Backend API / runtime	Aditya Kumar / Sylindril	39	4,243	1,581	2,700
Backend API / runtime	Arthur Chien	10	1,010	243	1,439
Backend API / runtime	Aspen Chen	14	3,618	141	3,631
Backend API / runtime	Danni Qu / Angela	3	123	31	105
Backend API / runtime	Hin Kit Eric Wong	13	2,208	81	1,394
Backend API / runtime	Yuling Wang	7	370	30	352
Chat interface	Aditya Kumar / Sylindril	16	2,190	1,707	677
Chat interface	Arthur Chien	15	2,342	730	1,655
Chat interface	Aspen Chen	9	580	56	473
Employee detail tabs	Aditya Kumar / Sylindril	18	1,337	337	1,127
Employee detail tabs	Arthur Chien	10	549	27	364
Employee detail tabs	Aspen Chen	14	2,537	175	2,380
Report / metrics / trajectory	Aspen Chen	8	4,186	158	4,027
Skill ingestion / evaluation	Arthur Chien	16	2,207	519	1,866
Skill ingestion / evaluation	Aspen Chen	12	1,328	114	1,683
Skill ingestion / evaluation	Danni Qu / Angela	4	485	73	1,024
Skill ingestion / evaluation	Hin Kit Eric Wong	1	1,547	5	507
Skill ingestion / evaluation	Yuling Wang	5	225	36	225
Workspace / editor / project files	Aditya Kumar / Sylindril	16	1,855	1,454	625
Workspace / editor / project files	Arthur Chien	11	2,547	244	2,702
Workspace / editor / project files	Aspen Chen	14	2,110	113	2,130
Workspace / editor / project files	Danni Qu / Angela	4	169	37	101
Workspace / editor / project files	Hin Kit Eric Wong	1	1,144	0	460
Workspace / editor / project files	Yuling Wang	5	222	13	222

Pure or near-pure current-blame checks:

Subsystem signal	Contributor	Current blamed lines	Share	Scope
Project Files tab component	Arthur Chien	234 / 234	100.0%	`frontend/src/components/employee/EmployeeProjectFilesTab.jsx`
Metrics and trajectory backend core	Aspen Chen	1,630 / 1,630	100.0%	`backend/metrics.py`, `backend/trajectory.py`, `backend/trajectory_llm.py`, `backend/prompts`
Browser live view component	Aspen Chen	187 / 192	97.4%	`frontend/src/components/BrowserLiveView.jsx`
Report UI components	Aspen Chen	2,224 / 2,250	98.8%	report-card, performance, trajectory drawer, trajectory node, and message-rating components

Reproduction

Run `bash docs/contribution_report/contribution_evidence.sh` from the repository root to regenerate the headline tables. The script prints its own generation timestamp and defaults to `EVIDENCE_REF=origin/main`, so unmerged PR branches are excluded unless someone explicitly overrides that environment variable. The script applies the attribution corrections for `86d234a` and Reflexion clobbering, and it excludes cache artifacts, JSON, docs/markdown, tests, and test/run fixtures from the primary production quantities. Additional subsystem path arrays are defined in that script so the same command regenerates the backend, agent, chat, workspace, report, skill-ingestion, and employee-tab quantities. Raw path-specific commit lists are omitted by default because the tables and cited commit tags are easier to read; run `INCLUDE_COMMIT_HISTORY=1 bash docs/contribution_report/contribution_evidence.sh` if a full audit trail is needed. The core audit commands are:

```
bash docs/contribution_report/contribution_evidence.sh
git log origin/main --no-merges --numstat --format='@@@%H%x09%aN' -- .github/workflows frontend/src backend/routers backend/db
        backend/services backend/tests backend/alembic start.sh .env.template backend/.env.example backend/server.py backend/reflexion_agent
        backend/metrics.py backend/trajectory.py backend/trajectory_llm.py backend/config.py.example
git ls-tree -r --name-only origin/main -- .github/workflows frontend/src backend/routers backend/db backend/services backend/tests
        backend/alembic backend/server.py backend/reflexion_agent backend/metrics.py backend/trajectory.py backend/trajectory_llm.py
        backend/config.py.example start.sh .env.template backend/.env.example | awk '$0 !~ /(__pycache__\/|[.]pyc$|[.]pyo$|[.]json$|
        [.]md$|\/docs\/|(^|\/)tests?(\/|$)|(^|\/)test[-_][^\/]*[.](py|sh)$|\/skill-eval-runs\/)/' | xargs -I{} git blame --line-porcelain
        origin/main -- {}
```

To regenerate the email-ready PDF after editing this markdown, run:

```
bash docs/contribution_report/build_pdf.sh
```

That command regenerates `docs/contribution_report/contribution_timeline.svg` from merged `origin/main` history and writes `docs/contribution_report/contribution_report.pdf`. Use `EVIDENCE_REF=main bash docs/contribution_report/build_pdf.sh` if rebuilding from a local branch instead of `origin/main`.

Post-Fork Technical Contributions

A now-abandoned codebase also contained some technical work.

https://github.com/enoshimakunn/hal-harness

This fork was created from `princeton-pli/hal-harness` on 2026-02-02 18:53 UTC. Counts below use `git blame` only on surviving source-code lines whose blamed commit is fork-only and absent from `princeton-pli/main`. Inherited upstream lines, tests, docs/Markdown, JSON/CSV/TXT data, config/env files, and copied benchmark/vendor snapshots are excluded.

Contributor	Filtered blamed lines	Technical contribution	Commits
Aspen Chen / `enoshimakunn`	582	OpenHands SWEBench/BNY agent path, multimodal training pipeline, tool-calling skill updates, and skill-name regularization.	`86e9567`, `a66ffee`, `6818932`, `9dbad82`, `3053b4c`
Yuling Wang	964	Runner and USACO integration, HAL skill-evaluation framework, embedding-model support, and LLM grading.	`52a33c1`, `fbcf55a`, `14ae8d4`
Danni Qu / Angela	164	OpenHands SDK agent for USACO evaluation, Docker cleanup, and Weave evaluation changes.	`9bb71c5`, `895a509`, `e3ff835`, `335b776`
Arthur Chien	2,134	GPT model pricing, financial-agent benchmark, `financial_agent` implementation, and related docs.	`13d4726`, `6b4c394`, `c4d3b5e`, `6b61e56`
Aditya Kumar	1,083	Slack integration for the core agent, including listener/tool modules and runtime wiring.	`d81edb3`

Merge-only upstream sync commits after the fork include `74ffec7` and `dda0afc`; they are not counted as direct technical contributions above.
